Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wiederseim, U. S. Patent 956,916 in view of Engelhardt, U. S. Patent 4,681,253 and Marder, US 2472114.
3. Wiederseim teaches a display comprising a one-piece folder construction having a first side panel (2) and a back section (1), wherein the first panel is foldable over the back section and has slot 8 that engages the tab 9 of back section. The first panel (2) having a viewing section comprising a die- cut window (3). When the back section is engaged with the first side panel the back section has a curvilinear design. Wiederseim does not teach the display having a plastic sheet over the die cut window.

4. Engelhardt teaches a foldable display having a front or first panel having a window 17 covered with a plastic transparent sheet 18. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the window of the display taught by Wiederseim covered with a plastic sheet as taught by Engelhardt to provide a means to protect the interior of the display.

5. Marder teaches a picture frame 5 with a front transparent sheet 6 having opaque image thereof for cooperation with display sheets 8 mounted behind the sheet 6. It would have been obvious to construct the plastic sheet taught by Engelhardt with opaque indicia thereon as taught by Marder to provide a means create a three-dimensional image.

6. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wiederseim, U. S. Patent 956,916 in view of Engelhardt, U. S. Patent 4,681,253 and Myers, US 5035929.

7. Wiederseim teaches a display comprising a one-piece folder construction having a first side panel (2) and a back section (1), wherein the first panel is foldable over the back section and has slot 8 that engages the tab 9 of back section. The first panel (2) having a viewing section comprising a die- cut window (3). When the back section is engaged with

the first side panel the back section has a curvilinear design. Wiederseim does not teach the display having a plastic sheet over the die cut window.

8. Engelhardt teaches a foldable display having a front or first panel having a window 17 covered with a plastic transparent sheet 18. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the window of the display taught by Wiederseim covered with a plastic sheet as taught by Engelhardt to provide a means to protect the interior of the display.

9. Myers teaches a picture with a lenticular image. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the picture of the device taught by Wiederseim and Engelhardt with a flexible lenticular picture as taught by Myers to provide a device with an enhance three-dimension effect.

Allowable Subject Matter

10. Claims 33 and 35 are allowed.

11. The indicated allowability of claim 3 and 5 is withdrawn in view of the newly discovered reference(s) to Marder and Myers et al. Rejections based on the newly cited reference(s) recited above.

Conclusion

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

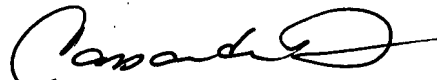

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
